

Protect your
home!

gr
green
cedar™

gr
green
slate™

Made from recycled plastic and limestone, GR Green patented products are the first synthetic roofs to be truly manufactured green.

GR Green Slate and GR Green Cedar meet Built Green and LEED building standards as well as 'Cradle to Cradle', a stringent sustainable manufacturing standard where nothing is wasted and materials are up-cycled without harming the environment.

Make your next
roof, your last!

GR Green is committed to offering quality, value, transparency and eco-responsibility to our customers.

Our products:

- are manufactured green from cradle to cradle,
- exceed Canadian building standards,
- can be nailed without breaking,
- look natural,
- last over 50 years,
- cost less than all other premium products!

Naturally Synthetic!

gr green cedar™ and gr green slate™

Our roofs beat the competition on performance, aesthetics and price, without harming the environment!

Least Environmental Impact:

- Cradle to Cradle standard
- Wastes nothing - recycled, recyclable, sustainable
- Each typical roof recycles 4,400 milk bottles and 44,000 plastic bags!

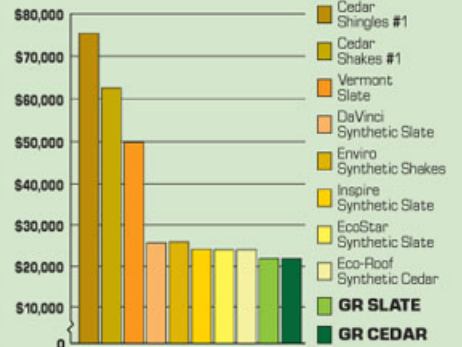

Performance tested:

- Exceeds all Canadian building standards
- Water repellent - no moss, no rot.
- Hail impact, freeze/thaw and wind resistant
- Fire retardant
- Made in Canada!

Best value:

- Looks natural
- Lasts longer
- 50 year limited warranty
- Colour fast
- Easy to install - nailed
- Light weight - no engineered trusses
- Costs less than competition!
